Desoli Tee

Base

Whether you're big wall climbing or chilling in your hammock, the right base is essential to stay comfortable. Our base layers and underwear are light, soft, experts at moisture management and cut for maximal freedom of movement.

Build a strong foundation: Base layers

HIKING, RUNNING, SKIING, CLIMBING - Whatever makes your heart beat, the right base is essential to stay comfortable. All of our baselayers are made in natural materials, never mixed with synthetics, so we're able to create fully circular and high-performance garments.

The wool we use is guaranteed mulesing-free, naturally anti-static and odor-resistant. We offer various weights and fabric compositions in our base layer segment, so you can always pick the base that suits you best. all year around. 

“Rely on the pure performance of nature itself”

Desoli Light

Made in Solid Merino™ a light, stretchy and thermoregulating fabric in pure 17,5 µm merino wool. The 150 g/m² knit is suitable for 4-season use and perfect for high pulse activities like running, hiking, climbing or ski touring when you need warmth but want to avoid overheating.

*Slim fit
Grid construction for added airflow
17,6 µm merino wool
Weight: 270 g/m²*

Desoli Mid

Made in Solid Interlock Merino™, a soft and warm fabric made with nothing but pure 17,6 µm merino wool. The 195 g/m² weight puts it in the mid weight category, ideal for alpine skiing, hiking in cold conditions or any wintertime activity where it's essential to stay warm and dry.

*Slim fit
Soft and warm
17,6 µm merino wool
Weight: 195 g/m²*

Desoli Thermal

Made in Solid Gridmerino™, a fabric made with pure 17,6 µm merino wool that weighs 270 g/m² providing great insulation and thanks to the grid construction you also have high airflow. Use as a first or second layer for activities like skiing, mountaineering or any wintertime adventure where you need extra insulation.

*Slim fit
Grid construction for added airflow
17,6 µm merino wool
Weight: 270 g/m*

Insulation: The Art of the Houdi

SINCE WE LAUNCHED OUR CLASSIC POWER Houdi almost 20 years ago, we have spent countless hours refining and perfecting the hooded outdoor jacket. We now offer several versions, in Polartec fleece, wool from Reda or with Primaloft padding. They share the same basic cut that our customers love, but have different characteristics due to materialization and performance details.

Over the years, our Houdi has been to every corner of the world, seen laughter and tears, witnessed great adventures and everyday moments. The Power Houdi is used on average 10 years and every Houdi carries a story worth telling. The only question is: What stories will your Houdi tell?

*“What stories will
your Houdi tell?”*

Outright Houd

Light version of the classic Power Houdi made from Polartec® Power Stretch® Pro™ Light. The perfect option for warmer climates or activities when the Power Houdi becomes too hot.

- 59% polyester, 33% polyamide, 8% elastane
- Knitted face, brushed inside
- Light and agile
- Weight 170 g/sqm

Power Houdi

The one and only. Iconic Houdini fleece jacket made from the exceptional Power Stretch® Pro™ from Polartec®. Comfort meets performance in a garment built to last for ages.

- 57% polyester, 33% polyamide, 10% elastane
- Knitted face, brushed inside
- Warm and comforting
- Weight 246 g/sqm

Mono Air Houdi

This light and durable insulation jacket sheds 80% less microfibers and is made from recycled and recyclable fibers. Instead of having a fuzzy open face fabric, the fibers are knitted between two layers of hard face fabric, creating a durable and smooth midlayer for high-intensity adventures.

- 73% recycled polyester 27% elastereel-polyester
- Anti-shedding
- Durable hardface treatment
- Weight 280 g/sqm

Insulated shell

Our range of insulated shells are designed to keep you warm in any situation and any weather. We only use cutting edge synthetic padding because we believe in the advantages of modern technology rather than stealing birds' feathers. The garments are made in lightweight, stowable fabrics to ensure that you can always have them close at hand.

W's Bouncer Jacket

Shell

We are expanding the idea of what a shell layer should be. Everything from light windbreakers, via our new ultra progressive wool shell to fully featured wind- and waterproof garments. The basic concept is to provide our users with the maximal level of comfort with the lowest possible environmental impact. Every garment in our shell collection are made from recycled, recyclable, renewable or biodegradable fibers. Often a combination of several. They are also completely free from fluorocarbons.

W's Rollercoaster Jacket

FALL / WINTER 2022

Fabric Hard Facts

Active Knit

Fully circular pure polyester double knit with mechanical stretch. The mono material construction without elastane provides a warmer and “drier” feeling compared to elastane.

- Origin: Japan
- Made from 57% recycled polyester and 43% polyester
- Fully recyclable
- Weight 205 g/sqm
- Wicking finish
- Quick dry
- pH Pure™ treated

Activist TreeMerino™

Optimal organic solution for the future. Softer than plain merino and with effective moisture management.

- Origin: Sweden
- 60% merino wool 20µ, 40% TENCEL™ Lyocell
- Weight: 170 g/sqm
- Mulesing free merino wool from Australia and South Africa, TENCEL™ Lyocell from Lenzing in Austria (with EU Ecolabel)
- Wool and cellulosic based renewable fiber
- Softer than plain merino
- Vapor and moisture management
- Next-to-skin comfort
- Mechanical stretch
- Naturally odor free
- Made from renewable and biodegradable fibers

Apex 3L Hardshell™

High density woven fabric with a smooth, abrasion resistant face and an ultra light friction free inside. Waterproof, breathable, with good abrasion resistance.

- Origin: Japan
- 70% Eco Circle® recycled polyester, 30% polyester face fabric
- Atmos™, 100% polyester membrane
- 100% polyester jersey backing fabric
- Weight: 195 g/sqm
- Breathability: 15,000 g/m2/24 hrs
- Waterproofness: 20,000 mm H2O or higher
- Water repellency treatment - PFAS free

Atmos Membrane™

Atmos Membrane™ is a hydrophilic membrane, not micro porous, and at the molecular-level moisture moves through the fabrics. The more moisture that is in circulation the greater the ability of the membrane to move moisture away from your body. With Atmos we are sure we have a membrane that delivers Houdini standards when it comes to high performance in an environmentally sustainable way, which no other membrane at the market can live up to. Atmos membrane™ is made from recyclable polyester.

Bluesign®

In our work to be as environmentally friendly as possible we have chosen to work with bluesign®. Houdini as a company are a bluesign®-partner and from now on, when we chose new suppliers, we make sure they are part of the bluesign® standard. The basic idea behind the bluesign® standard is to combine aspects of consumer safety, water and air emissions as well as occupational health in a single standard under the general objective of resource productivity. The bluesign® standard guarantees that along the complete production chain, products only contain components and pass through processes, that are harmless to people and the environment. The bluesign® standard considers all inputs, processes and technologies at their source.

C9 Ripstop™

Ultralight yet durable woven fabric with fantastic breathability and next-to-skin comfort. A well tested classic Houdini-fabric that we use in many different garments.

- Origin: Japan
- 100% recycled polyester
- Weight: 65 g/sqm
- Excellent air permeability
- Soft next-to-skin comfort
- Dull and silent surface
- Water repellency treatment - PFAS free
- Recyclable

Cham TreeMerino™

This light chambray material in Merino wool and TENCEL™ mix gives you superior comfort and softness. The natural properties of the materials provides a light and cooling comfort for hot days with superior moisture management, but still keeps you warm when it gets chilly.

- Origin: Taiwan
- 51% TENCEL™ Lyocell 49% merino wool 18.9µm
- Weight: 188 g/sqm
- Mulesing free merino wool from Australia, TENCEL™ Lyocell from Lenzing in Austria (with EU Ecolabel)
- Natural vapor and moisture management

- Softer than plain merino
- Next-to-skin comfort
- Light and soft material
- Naturally odor free
- Made from renewable and biodegradable fibers

Coil TreeMerino™

A comfortable terry fabric with all the good properties of wool combined with the softness of Tencel®. Perfect for everyday use.

- Origin: Sweden
- 60% merino wool 19,3µ, 40% TENCEL™ Lyocell
- Weight: 230 g/sqm
- Mulesing free merino wool from Australia, TENCEL™ Lyocell from Lenzing in Austria (with EU Ecolabel)
- AME traceable program
- Nature Texx Plasma treated for easy care
- Made from renewable and biodegradable fibers

Delta Base™

The ultimate synthetic base. Instant dry feeling, next-to-skin comfort and built-in stretch.

- Origin: Japan
- 63% polyester, 37% EcoCircle® recycled polyester
- Weight: 127 g/sqm
- Moisture management fibermix
- Wicking finish
- Textured delta fibers
- Mechanical stretch
- pH Pure™ treated
- Recyclable

Econ Stretch™

Light, soft, and stretchy fleece with smooth knitted face.

This fabric has the ultimate balance between performance and comfort, suitable for both mountaineering missions or chilling in your cabin.

- Origin: Italy
- 94% recycled polyester, 6% elastane
- Weight: 250 g/sqm
- Excellent warmth-to-weight ratio
- Moisture management
- 4-way stretch
- Jersey face
- Bluesign® certified

Emergency 3L

Our lightest shell layer. This 3L shell is constructed to have ultimate performance of a waterproof breathable layer, with the lightness and comfort of a 1L. Packable to come along to all adventures.

- Origin: Japan
- Face: 100% recycled polyester jersey
- Atmos™, 100% polyester membrane

- Back: 100% recycled polyester tricot
- Weight: 71 g/sqm
- Breathability: 46,000 g/m2Y24 hrs
- Waterproofness: 20,000 mm H2O or higher
- Water repellency treatment - PFAS free

Flux Weave

A unique fabric with all the benefits of a synthetic performance fabric: It is light, stretchy, quick-drying and very tough. But it also has the touch and feel of a natural fabric: A living structure, softness and pleasant breathability.

- Origin: Japan
- 85% recycled polyester 15% polyester
- Weight: 165 g/sqm
- Wicking finish
- Quick dry
- Linen touch spun polyester
- Recyclable

Immix Twill

Light yet highly durable polyester fabric with mechanical stretch. Perfect for garments where you need a tough fabric that can take a lot of wear and tear.

- Origin: Taiwan
- 75% recycled polyester 25% polyester
- Weight: 182 g/sqm
- Wicking finish
- Quick dry
- 2-way mechanical stretch
- Bluesign® certified
- Recyclable

Lambswool™

Natural organic fiber that provides a soft and warm feeling.

- Origin: Sweden
- 100% lambswool, Australia
- 19,5 Micron

Liquid Rock™

Ultralight yet extremely durable quick-drying stretch woven with fantastic breathability and cotton-like comfort.

- Origin: Taiwan
- 56% polyamide, 38% recycled polyamide, 7% elastane
- Weight: 107 g/sqm
- 2-way stretch
- Durable high density weave
- Peached finish with dull face
- Soft next to skin comfort
- Excellent air permeability
- Quick dry
- Bluesign® certified

Lite Breather™

A plain woven fabric that gives you comfort next to skin

FALL / WINTER 2022 FABRIC HARD FACTS

- Origin: Taiwan
- 100% recycled polyester
- Weight: 79 g/sqm

- Recyclable

Motion Comfortshell™

Durable, yet lightweight and quickdrying softshell. Water repellent and soft next-to-skin.

- Origin: Japan
- 75% recycled polyester 25% polyester
- Weight: 225 g/sqm
- 2-way stretch
- Durable high density face
- Good balance between wind resistance and air permeability
- Non-membrane
- Soft twill construction inside
- Moisture management performance
- Water repellency treatment - PFAS free
- Recyclable

Octa C9 softshell

Light softshell fabric with a smooth, durable face and a backer with open filament fibers, creating a light insulation that never hinders breathability. The face breaks the wind and is treated with a PFAS free water repellency finish that will shelter you from light snow or a quick rain shower.

- Origin: Japan
- Face: 100% recycled polyester
- Back: 57% recycled polyester, 43% polyester
- Weight: 150 g/sqm
- Wind resistant but still some air permeability
- Rapid moisture absorption
- Quick drying

- Excellent moisture transportation
- Good insulation
- Water repellency treatment - PFAS free
- Recyclable

Polartec® Power Air Light

A new light fabric construction where fibers that trap warm air are encapsulated in small pockets. This creates a wonderfully warm and breathable fleece jacket that shed a fraction of the microplastic compared to a normal fleece. Light, durable and warming.

- Origin: USA
- Weight: 268 g/sqm
- 73% recycled polyester 27% elastrelle-polyester
- 4-way stretch
- Polartec® Power Air insulation fabric
- Insulating air encapsulating technology
- Bluesign® certified
- Recyclable

pH pure™

In perfect balance with your skin. Just like your skin, the pH level of our treated products are slightly acidic. Low pH-value results in an environment that prevents odor-causing bacteria. In partnership with your skin our products will stay fresh, selectively controlling bacterial growth causing odors and skin irritation while promoting beneficial bacteria. Durable, sustainable performance added at fiber level that won't get washed out. Making sure you stay fresh in a natural way.

Polartec® Power Stretch Pro®

Soft and supple microfiber stretch fleece insulation with an instant dry feeling and a jersey face with superior durability.

- Origin: Italy
- 57% polyester, 33% polyamide, 10% elastane
- Weight: 246 g/sqm
- Excellent breathability
- Active moisture management
- Quick dry bi-component construction
- Wicking microfleece inside
- 4-way stretch
- Durable polyamide face
- Bluesign® certified

Polartec® Power Stretch Pro® Light

Soft and supple microfiber stretch fleece insulation with an instant dry feeling and a jersey face with superior durability.

- Origin: Italy

- 59% polyester, 33% polyamide, 8% elastane
- Weight: 170 g/sqm
- Excellent breathability
- Active moisture management
- Quick dry bi-component construction
- Wicking microfleece inside
- 4-way stretch
- Durable polyamide face
- Bluesign® certified

PrimaLoft® Gold Insulation Active +

A highly water repellent, durable and quick drying alternative to down. Exceptional warmth-to-weight ratio.

- Origin: China
- 55% recycled polyester, 45% polyester
- Weight: 40 g/sqm, 60 g/sqm

- Ripstop
- Mechanical stretch
- Soft hand
- Water repellency treatment - PFAS free
- Bluesign® certified
- Recyclable

Rise Ripstop™

Durable ripstop fabric with soft touch. Water repellent, highly wind resistant, ultralight and stowable.

- Origin: Japan
- 100% recycled polyamide
- Material from Pertex®
- 37g/sqm
- Highly wind resistant
- Ultra light
- Ripstop construction
- Water repellency treatment - PFAS free
- Bluesign® certified

Solid Flannel Merino™

A soft and warm woven flannel fabric made from 100% superfine merino wool.

- Origin: Italy
- 100% merino wool 17,60µm
- Weight: 193 g/sqm
- Mulesing free merino wool from New Zealand
- ZQ traceable wool program
- Certified by EMAS (EU Eco-Management and Audit Scheme)
- Made from renewable and biodegradable fibers
- Naturally odor resistant

Solid Gridmerino™

A new dimension of wool fabric combining super soft merino wool with a technical grid construction.

- Origin: Italy
- 100% merino wool 17,60µm
- Weight: 270 g/sqm
- Mulesing free merino wool from New Zealand
- ZQ traceable wool program

- Certified by EMAS (EU Eco-Management and Audit Scheme)
- Vapor and moisture management
- Next-to-skin comfort
- Mechanical stretch
- Made from renewable and biodegradable fibers

Solid Interlock Merino™

A warm and stretchy base layer fabric in 100% super fine merino wool. Great next-to-skin comfort and thermoregulating properties.

- Origin: Italy
- 100% merino wool 17,60µm
- Weight: 195 g/sqm
- Mulesing free merino wool from New Zealand
- ZQ traceable wool program
- Certified by EMAS (EU Eco-Management and Audit Scheme)
- Vapor and moisture management
- Next-to-skin comfort
- Naturally odor resistant
- Mechanical stretch
- Made from renewable and biodegradable fibers

Solid Merino™

Light and stretchy base layer fabric in 100% super fine 17,5 µm merino wool. Works all year around for everything from skiing to running.

- Origin: Lithuania
- 100% merino wool 17,5 µm
- Mulesing free merino wool from Australia
- Weight: 150 g/sqm
- Vapor and moisture management
- Next-to-skin comfort
- Mechanical stretch
- Naturally odor free
- Made from renewable and biodegradable fibers

Spheric 2L Hardshell™

Supple, soft and silent stretch hardshell. Waterproof, breathable, lightweight and stowable.

- Origin: Japan
- 70% Eco Circle® recycled polyester, 30% polyester
- Atmos™, 100% polyester membrane
- Weight: 110 g/sqm
- Breathability: 15,000 g/m²/24 hrs
- Waterproofness: 20,000 mm H₂O or higher
- Water repellency treatment - PFAS free
- 2-way stretch
- Textures delta fiber face for durability and stretch

Spinner Ripstop™

High density ripstop polyester. Water repellent, highly wind resistant, ultralight and stowable.

- Origin: Taiwan
- 100% recycled polyester
- Recyclable
- Bluesign® certified
- Weight: 37g/sqm
- Ripstop construction for durability
- High density microfibers with 22D*22D
- Highly wind resistant
- Cired backside
- Water repellency treatment - PFAS free

Surpass 2.5-L Hardshell™

Recycled and recyclable polyester shell. It's wind- and waterproof, highly breathable, light, soft and stretchy.

- Origin: Japan
- 70% Eco Circle® recycled polyester 30% polyester
- Atmos™, 100% polyester membrane
- Recyclable
- Weight: 113 g/sqm
- Breathability: 15,000 g/m²/24h
- Waterproofness: 20,000 mm H₂O or higher
- 2-way stretch
- Smooth and durable face
- Soft and silent surface
- Water repellency treatment - PFAS free

Switch Woven™

Polyester plain weave with dull face. Water repellent, highly wind resistant, lightweight and stowable.

- Origin: Taiwan
- 100% recycled polyester
- Bluesign® certified
- Weight: 73g/sqm
- Microfiber
- Cired backside
- Highly wind resistant
- Water repellency treatment - PFAS free
- Smooth and durable face
- Soft and silent surface

FALL / WINTER 2022 FABRIC HARD FACTS

Woodland Jersey

100% TENCEL™ lyocell fabric made in Lenzig, Austria from sustainable sourced woodpulp. It has an incredibly soft touch, a smooth drape and cool feel against the skin on warm summer days.

- Origin: Italy
- 100% TENCEL™ Lyocell
- Weight: 158 g/sqm
- TENCEL™ Lyocell from Lenzing in Austria (with EU Ecolabel)
- Soft next-to-skin
- Closed loop production process with minimal waste

Wool Shell™

100% super fine merino wool in a durable woven construction. This fabric offers something beyond an ordinary shell layer.

- Origin: China
- 100% super fine merino wool, 16µm
- Weight: 245g/sqm
- Mulesing free wool from Australia
- Durable woven construction
- Wind resistant by construction
- Made from renewable and biodegradable fibers

Woolly TreeMerino

Warm, fluffy and soft merino wool fleece made only with natural fibers.

- Origin: Sweden
- 60% merino wool 19,3µ, 40% TENCEL™ Lyocell
- Weight: 360 g/sqm
- Naturally odor resistant
- Mulesing free and traceable merino wool from Australia
- TENCEL™ Lyocell from Lenzing in Austria (with EU Ecolabel)
- AME traceable program
- Nature Texx Plasma treated for easy care
- Made from renewable and biodegradable fibers
